Mr. W. Wade Head  
Area Director, Phoenix Arizona

Dear Mr. Head:

During the past two years a number of revisions have been made by local Reservation agencies in the schedules of water right claims, copies of which have been previously filed in your office and the office of the Utah State Engineer. Copies of these schedules have also been supplied to other agencies of the Federal Government, the State of Utah, and individuals who may have an interest and are charged with the responsibility of adjudicating water right claims in the Uintah Basin, including those of the Ute Indian Tribe of the Uintah and Ouray Reservation. The state Engineer has requested, and his request has been concurred with by the Bureau of Indian Affairs, that the adjudication of these rights be a preliminary requirement to the development of the Central Utah Irrigation Project.

The schedules have now been reviewed and corrected and adjusted where necessary to incorporate the revisions which have been made in the original schedules. The original schedules have been previously revised and revised copies distributed to those to whom copies of the original schedules were supplied. Should any of the enclosures herewith be a duplicate of previous revisions, the duplicate enclosures herewith can be discarded.

The enclosures herewith consist of 26 pages described as follows:

Page I - This page was clarified in the last paragraph by including the total acres of class I and II land.

Page II - This page was modified in the first paragraph to include tributaries of the Duchesne River having their confluence above the diversion of the Uintah Irrigation Project's Paheasee Canal.
